

REMARKS

This Amendment is submitted in response to the Examiner's Action dated 18 July 2003.

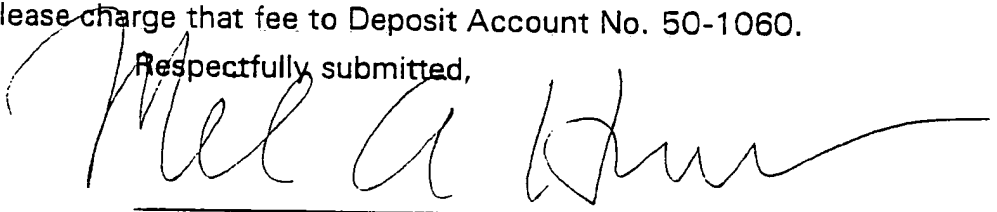

Applicant has amended the specification in order to claim the benefit of priority to a co-pending application, which is commonly owned, and which has an overlap in inventors. Applicant submits that this claim of priority is proper. Applicant further submits that this claim of priority removes the Titmuss et al. reference (USPN 6,397,040) as a reference.

Applicant has not amended claim 1. Applicant submits that it is novel over the known prior art. Applicant has added new Claims 2-10. These claims contain all the limitations of claim 1, but introduce additional features. Applicant submits that these claims are also novel over the known prior art. Applicant respectfully requests allowance of all pending claims.

Applicant encloses a draft substitute declaration which includes the claim of priority. Once the Examiner enters the amendment to the specification, Applicant will have the substitute declaration executed by all inventors and will submit it to the Examiner.

Enclosed is a check in the amount of \$776.00 for the additional claims and fees and a request for a three month extension of time is enclosed herewith. If any additional fees are required please charge that fee to Deposit Account No. 50-1060.

Respectfully submitted,
